Experience

Vidal Lupian works as a Technology Consultant for Granite GRC Consulting. He works closely with the team and with clients to ensure all technology needs are met. He also plays an active role forming and executing Granite GRC's internal IT strategy, including maintaining and improving network performance, security and infrastructure.

Vidal's background includes consulting with businesses on projects involving upgrading network infrastructure, managing help desks, and executing and streamlining internal processes. He applies this experience to working with Granite GRC clients to improve their IT processes and infrastructure. Previously, he was responsible for implementing cloud-based productivity solutions, such as Microsoft Azure and Office 365. He has also worked with clients to create hybrid, cloud-based or on-site networking solutions designed to suit specific business needs.

Vidal's expertise comes from serving as both an in-house technician and as a system administrator responsible for delivering IT services to clients for an IT solutions company. He has also worked as a network administrator for a security solutions company.

He earned his B.S. in Information Technology in Network Management from Colorado Technical University.
