

Taking control of your network security in an increasingly unpredictable environment.

Our security team offers a comprehensive selection of services to help you identify your weaknesses and protect your network while satisfying applicable regulatory requirements. Making digital security available to everyone, we offer a variety of options and approaches with 5 star service and at prices that make sense to the bottom line.

“Granite GRC provides comprehensive cyber security strategies and approaches.

The good guys have to worry about covering up every single potential entry way into their systems; the bad guys only need to find one entry way once.”

from Chuck Rapp,
Director of Information Technology

Rising to the Challenges

Granite GRC's Cyber Security team works with large and smaller organizations across healthcare, the life sciences, professional services and other areas of business to protect their companies and clients from the persistent and growing threats of our modern environment. Our dedicated team is highly experienced in all facets of information privacy and security. Whether you are assessing existing security controls, improving the security of an existing network, or initiating a new security approach we are committed to offering you the tools, strategies and best practice solutions that best fit your situation.

Products & Services

- Cyber security assessments and benchmarking
- Vulnerability scanning and remediation
- Penetration testing and remediation
- Managed detection and response
- PCI, HIPAA and other regulatory standards and requirements
- Coaching, consulting, part time and interim CISOs

Success Stories

Granite GRC deployed a SIEM to a client and within months it paid for itself by quickly alerting the firm of a cyber security breach at a vendor who regularly provides software updates for the firm. Our quick actions and responsiveness allowed for successful mitigation of the threat!

Meet the Cyber Security Team Leads

Charles "Chuck" Rapp

Director of Information Technology; Cyber Security Team Lead

Charles "Chuck" Rapp is the Director, Information Technology for Granite GRC Consulting. He works closely with the team and with clients to ensure all technology needs are met. He also plays an active role forming and executing Granite GRC's internal IT strategy, including maintaining and improving network performance, security and infrastructure.

Jared Stoner

Cyber Security Analyst

As Cyber Security Analyst, Jared Stoner is responsible for monitoring, identifying, analyzing, and responding to potential security incidents. Jared regularly conducts security assessments, and develops or updates incident response plans accordingly. He has experience working in email protection, endpoint detection and response, system configuration management, vulnerability management, and SIEM analysis, plus led efforts to successfully implement critical FDIC and State audit recommendations with a cybersecurity assessment tool.
